

Mohammed Khaleel Salih

Penetration Tester, Web Application Vuln Assessment & PHP Web-Developer

 muhamadxalil804@gmail.com  0750 323 9373  Badawa, Erbil  My_Portfilo

ABOUT ME

I am a Penetration Tester specializing in Web Application Vulnerability Assessment. I have identified and reported vulnerabilities on platforms such as **Grab** and **Zomato**, and other targets. I actively train on platforms like TryHackMe, Hack The Box, or Course labs, and regularly participate in Capture The Flag (CTF) competitions, including NexaCorp: Zero Credentials(API hacking), AshurCTF 2025 and SulyCybercon 2024, as well as various online CTF events.

EXPERIENCE

ZMC Group, Packaging- Employee

02/2025 – 04/2026

My-responsibility: I was working as a packaging employee I was responsible for packaging the products comes like phones, G-tab series.

Coordinating: helping my coworkers for making their pressure less also helping both of my managers also and Working under pressure, **sometime I was directly doing line-manager job.**

Coordinating-others: I was also helping the IQC-part (input quality control) I was checking the device parts like(screen and other) that comes from storage before it goes to and connecting to be a full product mobile and checking them if they are damaged or they are fine to go to next phase of production, also helping OQC-part (output quality control) which they also checked the product before it leaves company and goes to bazaar checking (software, scratch and others).

Vulnerability Assessment

10/2024 – 10/2024

Remote

- identifying OTP Authentication flow which leads to Account takeover from one of the **grab.com** subdomains which is one of the platforms that asking for security researchers for checking their programme if they found effective vulnerability they reward them.

Online Real Estate, Duration[1month]

07/2024 – 08/2024

I developed a full-stack online real estate platform using HTML, CSS, JavaScript PHP, and MySQL. I built the entire project independently, handling both front- end and back-end development, click  to see.

Erbil Governorate, Summer internship

07/2024 – 08/2024

Developing a database with Microsoft access with 3 other student for Erbil Governorate IT department & Fixing computer hardwares.

Electrical, Solar panel & Camera, 3 month working each year [student case]

2019 – 2022

After completing a course provided by Islamic Relief, I started working and improved my skills in residential electrical installations, Connecting Solar Panels For (Houses, Storages..etc) & also Camera Installations which That Made Me More Efficient.

CERTIFICATES

eWPTX (ine.com):  **76hours** of theory & hands-on labs about Web Application Penetration Testing from methodologies to advanced injections, API testing, Web Service testing, Session management & testing etc..

eWPT (ine.com) 2026: 106hours of theory & hands-on labs about Web Application Penetration Testing from methodologies to exploiting

eJPT (ine.com) 2025:  **153hours** of theory & practicing from information gathering to post-exploitation and persistence. which techs students how to test internal networks etc..

BugBounty Advance: from: Cybershield.krd (2024)

PEH: from: TCM-Security (2023)

Ethical Hacking V1: from: Cybershield.krd (2023)

Linux Operating System & Bash Scripting: from: Cybershield.krd (2023)

Electricity: from: Islamicrelief (2019)

Life Skills: from: Islamicrelief (2019)

EDUCATION

Shaqlawat Technical Collage, Information Technology

11/2022 – 06/2024

Completed two years in the Information Technology Department, ranking 5th with an average of **85.5 points**.

PROJECTS

Online Real Estate  , *Individual-Project*

07/2024 – 08/2024

Developing a Full-stack website for Real-Estate handling both front-end & back-end.

Kids Academy  , *Group-Project*

11/2023 – 01/2024

a Very visual & colourful project for teaching kids (numbers, letters, shapes & months) with a very professional design and soundable buttons.

Students Registration, Group-Project, For Shaqlawa Technichal Collage

11/2023 – 05/2024

Creating website that allows 12th-grade graduates to register by filling out their personal information. After successful registration, the system generates a digital ID card with a QR code that can be scanned to verify its authenticity and check whether it is valid or expired.

LANGUAGE

Kurdish

Native

English

Intermediate (B1/B2)

Arabic

Basic

TECHNICAL KNOWLEDGE & SKILLS

API Penetration Testing

Injection Vulnerabilities

Vulnerability Assessment & Exploitation

Productivity Tools

Microsoft Office (Word, Excel, PowerPoint)

Security Tools

Metasploit Framework (MSF), Burp suit, Owasp Zap, Acuintex, Nessuss & etc..

Server-Side Attacks

Manual Exploitation

Black Box Penetration Testing

Assessment Methodologies

Information Gathering, Footprinting, Enumeration

Web Application Penetration Testing Methodology

Web Technologiest

HTML, CSS, PHP, MYSQL

Web Application Reconnaissance

Filter Evasion & WAF Bypass

Authentication Attacks

Host & Network Penetration Testing

System/Host-Based Attacks, Network-Based Attacks, Exploitation using Metasploit (MSF), Post- Exploitation, and Social Engineering (Employee Security Testing)

Host & Network Auditing

Operating Systems

Windows, Kali-linux (distribution)
